Organicare USDA Certified Organic Skincare

MONDAY, NOVEMBER 17, 2008

I stumbled on Organicare skin care a while ago and I can't recall where. But I was able to test out a sample of their [Clarity Control Blemish Fighting AHA Serum](#) the last few weeks and I had to share my find with you. Organicare is a USDA Certified skin care line that focuses on the skin problems we all face. Whether its aging, acne or prevention - Organicare has developed skin care lines to address them with organic ingredients.

I know many of you are looking for something to control acne and I really believe this skin care line can solve that problem really well. As a reformed ~~Proactiv~~ user (I don't have bad acne issues but it helped me address random breakouts) I was desperate to find something to replace it. [Organicare's Clarity Control Blemish Fighting AHA Serum](#) has really helped with those random blemishes I used to get.

It works the same way a toner might work... I put a squirt or two on a cotton ball and swipe over blemish prone areas to keep the oily areas clear. I am really interested in trying the rest of this line to see if the other products perform as well.

Get It: Buy it online on iCareOrganics.com
